Sharp RZ3 - 15” touchscreen Optimised Visitor Management kiosk

Optimised Visitor Management

Helping you put the safety of your people first whilst creating a great first impression.

Accurate people movement.

- 15” PCAP LCD touchscreen display
- Optional badge printer/blanking plate
- Optional QR/bar code scanner
- Optional RFID card and fob reader

Our Optimised Visitor Management (OVM) kiosk is designed to protect the people and places that power your organisation. It uses perceptive software and intuitive touchscreen technology to provide a quick and easy way for your employees and visitors to sign themselves in and out of sites or building zones - they simply tap the screen to enter their details.

By using mobile apps in conjunction with geofence technology you can set up multiple zones that automatically sign employees in and out too, helping you to prioritise safety by letting your people sign in completely contact and touch-free.

And it’s not just for visitor or contractor management. OVM gives you a central database of up-to-date employee contact details and accurate data on their whereabouts, making it ideal for contact tracing. Having access to these insights means you can quickly notify everyone in the event of an emergency, and better-manage evacuations by providing instruction on what to do, helping you keep your people safe.
